

Participant Certificate

»Logistics IT Database«

The Fraunhofer Institute for Material Flow and Logistics confirms that
Epilog d.o.o.

is a participant in the »Logistics IT Database« for the evaluation period
2021/2022 with the Warehouse Management System

Atlas WMS 4.9.2

The »Logistics IT Database« is a service provided by the Fraunhofer IML and involves the evaluation of more than 3.700 individual aspects of Warehouse Management Systems. This includes information concerning the functionality of the software with all the usual functions and processes of a warehouse and additional services provided by the software vendor. Approximately 2.600 individual aspects of the system have been verified by Fraunhofer IML employees in collaboration with the WMS vendor.

The verified data are available for potential customers and other stakeholders of Warehouse Management Systems in the »Logistics IT Online Selection« on warehouse-logistics.com. The database therefore offers a simple, efficient and vendor-independent method for the pre-selection of Warehouse Management Systems. The validation seal is only awarded after the complete validation and affirms the evaluated functional scope of the WMS.

The certification DIN EN ISO 9001 of TÜV NORD CERT GmbH emphasises the high quality and proper implementation of the validation services in the area of warehouse logistics.

Dortmund, 28th October 2021
